

Advanced Topics in Networking

Winter

(in German: Advanced Topics in Networking)

Module-ID: FIN-INF-110513

Abbreviation	Credit Points	Semester	Term	Duration	Language	Level
ATN	5	Winter	starting at 5.	1 Semester	english	Bachelor

Link:	LSF
Limited accessibility:	
Responsibility:	David Hausheer
Lecturer:	David Hausheer
Classes:	• Lecture <i>Advanced Topics in Networking</i> • Exercise <i>Advanced Topics in Networking</i>
Applicability in curriculum:	- B.Sc. INF: Informatik - Wahlpflicht - B.Sc. CV: Informatik - Wahlpflicht - B.Sc. INGINF: Informatik - Wahlpflicht - B.Sc. WIF: Gestalten und Anwenden - Wahlpflicht - B.Sc. INF (bilingual): Informatik - Wahlpflicht

Intended learning outcomes:

Students...

- enhance their competence in the area of networking
- understand advanced networking concepts
- can explain these concepts to other participants

- are able to apply these concepts in theoretical use cases and practical exercises

Content:

The course deals with advanced topics in the area of networking:

- Overlay networks for content delivery, e.g., P2P, BitTorrent, CDNs, caching, overlay video streaming
- Distributed Hash Tables (DHT), e.g., Kademlia
- Blockchains
- Crypto currencies and Bitcoin
- Ethereum and smart contracts
- Secure network architectures, e.g., SCION
- Congestion Control, e.g., QUIC and Multipath-QUIC

Workload:

- 28h lectures
- 22h theoretical exercises
- 4h practical exercises
- 96h homework (further studies, preparation for the final exam)

Pre-examination requirements:	Type of examination:	Teaching method / lecture hours per week (SWS):
Prerequisites for the exam required; details will be announced at the beginning of the semester.	Written exam 120 minutes	• Lecture 2 SWS • Exercise 2 SWS

Prerequisites according to examination regulations:	Recommended prerequisites:
none	Modul <i>Computernetze</i>

Media:	Literature:
	Textbooks as indicated. Slides and paper copies as necessary.

Comments:

In früheren Versionen der Studien- und Prüfungsordnung ist dieses Modul als *WPF Technische Informatik* anrechenbar.

Revision #1
